

Please do not allow this law to pass. I used to get many calls a week and even though I had an answering machine, I would get no messages. I work 50 hours a week and get to spend few nights at home with my family. It would never fail, I would be home and the phone would ring, not from people we knew, but from companies wanting us to buy this or subscribe to that. We would asked to removed from their call list (as per the law they were supposed to do)I would then get twice as many from them. Please do not pass this lesser law, unless the states will have the ability to make restrictions tighter, and that the callers must abide by the state to state basis.
